SUMMARY

Senior Software Engineer with 12+ years of experience designing, modernizing, and supporting enterprise .NET and web applications. Hands-on expertise in C#, .NET Framework, .NET Core, SQL Server performance tuning, RESTful APIs, Angular, and cloud-native solutions on Microsoft Azure.

Contribute across requirements, design, development, testing, and production support, working with architects, developers, Product Owners, and stakeholders. Experience includes platform modernization, reusable identity integration, delivery automation, and production reliability. Recent work applies Generative AI agents, RAG, structured extraction, and browser automation to enterprise workflows.

TECHNICAL SKILLS

- Languages & Frameworks: C#, .NET Core, .NET Framework, ASP.NET Core, MVC, Web API, Entity Framework
- Frontend: Angular, TypeScript, JavaScript, AngularJS, jQuery
- Databases & Caching: SQL Server, stored procedures, indexing, execution plans, query optimization, performance tuning, Redis
- Architecture & Integration: Modular services, RESTful APIs, OpenAPI, caching strategies
- Security & Identity: OAuth2, OpenID Connect (OIDC), JWT, SSO, secure secret management
- Cloud & DevOps: Azure App Service, Functions, Service Bus, Blob Storage, Key Vault, Docker, Kubernetes (AKS), Azure DevOps, GitHub Actions, CI/CD
- SDLC & Delivery: Agile/Scrum, Git, code reviews, OpenSpec, SpecKit, GitHub Copilot
- Testing & Quality: xUnit, Moq, integration testing
- Applied AI: FAB agents, RAG, prompt engineering, structured extraction, LLM tool calling, agentic workflows

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Wolters Kluwer | Pune | Jul 2018 - Present

- Contribute to core backend services for CCH SureTax, supporting U.S. and Canadian tax calculations through business location, nexus data, and exemption-certificate logic.

- Work with Product Owners, stakeholders, and architects on requirements, technical designs, API specifications, and sequence diagrams; support developers through code reviews, debugging, and knowledge sharing.
- Contributed to .NET Framework-to-.NET Core modernization, refactoring components into modular, service-oriented designs and supporting Docker and AKS workloads.
- Implemented enterprise SSO with Wolters Kluwer OneID and contributed to reusable, configuration-driven OIDC integration for OneID, Google, and FusionAuth.
- Investigated and remediated production issues including memory leaks and expired Azure Service Bus SAS tokens, with work on observability, Redis caching, SQL tuning, and automated secret rotation through Azure Key Vault.
- Contributed to AI-powered SKU-to-product mapping using FAB-hosted RAG agents, product descriptions, and reference knowledge, with structured outputs, confidence-based acceptance, alternatives, and asynchronous .NET/Azure integration.
- Contributed to agentic tax returns filing using Stagehand/Playwright, PDF-to-JSON extraction and validation, LLM tool calling, configurable workflows, and human approval with pause/resume checkpoints.
- Initiated and developed an experimental AI DOR Extractor prototype for scheduled collection and LLM-assisted structuring of state Department of Revenue content using C#/.NET, Playwright, Quartz.NET, FAB agents, and Azure. It evolved into a feature; productionization and ownership were handed over to another team.
- Contributed to Credit Carry Forward workflow automation and decision support using Wolters Kluwer's FAB Agent framework, with attention to compliance and auditability.
- Contributed CI/CD automation using Azure DevOps and recently set up GitHub Actions during an ongoing transition toward GitHub-based development and delivery, supporting repeatable deployments to Azure.
- Worked on two projects in a recently introduced pod-based engineering model, collaborating directly with Product Owners and stakeholders. Apply Spec-Driven Development with OpenSpec, SpecKit, GitHub Copilot, and OpenAPI.

Software Engineer

Cybage Software Pvt Ltd | Pune | Sep 2014 - Jun 2018

- Developed and maintained full-stack web applications using ASP.NET MVC, Web API, AngularJS, SQL Server, and Microsoft Azure.
- Collaborated with clients and stakeholders on requirements and technical solutions; supported Azure deployments, production systems, and Agile delivery.

EDUCATION

Post Graduate Diploma in Advanced Computing (PG-DAC)
CDAC ACTS, Pune | 2014

Bachelor of Engineering - Electronics & Telecommunication
S.S.E.C, Bhilai | 2013
